DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 3, 6, 8, 10, 16, 18, 20-22, 25, 26, 33, and 34 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 16, 18, 20, 25, 26, 33, and 34 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Regarding claims 25 and 26, although the claims are method claims, a 101 process/method must be tied to another statutory class (such as a particular apparatus) or transform underlying subject matter (such as an article or materials) to a different state or thing. It is the understanding of the Examiner that the claims merely apply mathematical operations (selecting, multiplying, adding) to a signal which could be performed without a machine or processor and do not tie the claims to another statutory class since signals are non-statutory subject matter. Furthermore, the claims do not transform underlying subject matter (signal) to a different state or thing. See also MPEP 2106.IV.B.

Regarding claims 16, 18, 20, 33, and 34, the claims recite "computer readable medium". However, after review of the instant specification, it is the understanding of the Examiner, that

Art Unit: 2611

the computer readable medium recited in the claims can include paper (see page 26, lines 6-10).

Paper is non-functional descriptive material which is non-statutory subject matter (See MPEP 2106.01 [R-6]).

Allowable Subject Matter

4. Claims 1, 3, 6, 8, 10, 21, and 22 are allowable over prior art references.
